DEBRA NETHANIA STEVENSON

debra.nethania.s@gmail.com Jakarta Debra Stevenson

ABOUT ME

Analytical IT student at CCIT FTUI and Asia e University with a background in Full Stack development, Software Quality Assurance (SQA), and database management. Dedicated to leveraging technical logic, DevOps practices, and data-driven insights to support evidence-based research and scalable application development.

EDUCATION

Asia e University | 2024-Now

Faculty of Information and Communication Technology

- Relevant Coursework: Discrete Mathematics, Database Systems, Information Systems Analysis & Design, and Decision Support Systems (DSS).
- Focus: Developing a comprehensive understanding of how information systems support organizational strategy and data security.

CCIT FTUI | 2024-Now

Information Technology (Full Stack Developer)

- Technical Focus: PHP, Web Application Programming (WAP), and DevOps.
- Database Management: Practical experience in MySQL and MongoDB for building scalable applications.
- Methodology: Software Engineering fundamentals and Human-Computer Interaction (HCI) to ensure user-centric product development.

TECHNICAL & ACADEMIC PROJECTS

Lunera Streaming Platform (Web & Mobile) | Full Stack & SQA Developer

- Co-developed a secure web streaming platform and Flutter mobile client utilizing CodeIgniter 4 and MVC architecture.
- Designed and executed comprehensive test plans, documenting Gherkin-style test cases and test metrics to validate overall software quality.

Comic Web Application & DevOps Infrastructure | Front-End Developer & DevOps

- Collaborated in a two-person team to build a distributed comic web application, developing the PHP-based front-end interface to consume a Java Spring Boot REST API.
- Designed secure user and admin dashboards, handling JWT token authentication and dynamic data rendering.
- Containerized services with Docker and co-engineered an automated CI/CD pipeline using GitHub Actions.

Pawprint Haven Vet Clinic | Full Stack Web Developer

- Independently developed a comprehensive veterinary management web application using PHP, MySQL, HTML, and CSS.
- Engineered role-specific dashboards with secure session management for administrators, veterinarians, and pet owners.

Portify: Online Portfolio App | UI/UX Designer

- Partnered to design an online portfolio platform prototype in Figma, applying the 10 Usability Heuristics for an intuitive user experience.
- Co-developed responsive navigation frameworks and clear system status indicators to streamline user onboarding.

LEADERSHIP & ORGANIZATIONAL EXPERIENCE

CCIT FTUI Student Society (CSS) | Head of Department, Student Advocacy and Welfare

- Managed the leadership selection process for the 2026 Induction Days by directing staff execution and mentoring candidates on strategic proposals.

PEMIRA CSS | Head of Publication, Design, and Documentation

- Directed a 10-person publication team to manage live event documentation and execute social media engagement strategies.

CCIT Induction Days 2025 | Head of Division, Medics

- Trained divisional staff on first-aid protocols and oversaw comprehensive health monitoring for incoming students.
- Administered on-site medical care and managed emergency escalations by communicating critical updates to senior leadership.

CCIT FTUI Student Society (CSS) | Staff, Art & Culture

- Collaborated across departments to organize and execute a campus-wide photography and poster contest, managing event finances as treasurer.

TECHNICAL SKILLS

- Programming & Frameworks: PHP (CodeIgniter 4) and Web Application Programming (WAP).
- Database Management: Relational Database (MySQL), NoSQL (MongoDB), Database Schema Design, Normalization (1NF-3NF), and Data Integrity Management.
- Software Engineering & Tools: Systems Analysis & Design (SAD), SDLC, Git/GitHub, Docker (Containerization), Postman (API Testing), and Software Quality Assurance (SQA/Gherkin).
- UX & Design: Figma, Human-Computer Interaction (HCI), and UI Prototyping.
- Languages: Indonesian (Native), English (C1 Advance), Mandarin (Basic).

SOFT SKILLS

- Analytical Thinking: Strong capability in solving complex logical problems, developed through coursework in Discrete Mathematics and Software Engineering.
- Attention to Detail: Highly meticulous in maintaining data integrity and system validation to ensure high accuracy in analysis and reporting.
- Technical Communication: Skilled in translating complex technical data and system architectures into clear, actionable documentation for diverse stakeholders.
- Collaborative Teamwork: Experienced in working within multidisciplinary teams using version control tools like GitHub for seamless project coordination.
